No. 37

## Charter Petition Shy On Signatures, Is Claim

County Clerk Says 108  
More Names Are  
Required

According to the opinion of the city attorney, Daniel J. Hall, the proposed new charter for Richmond will have to lay over for another two years before it can be placed on the ballot and voted upon by the people.

Although there were 680 names attached to the charter amendment petition, all of which were verified by Clerk Wells, the law now requires 788 names, or 108 more than were on the petition.

This is unfortunate for the charter advocates and the people of Richmond in general, a large majority of the taxpayers who pay the city's expense bills favoring a revision of the charter, especially the election of councilmen for life, with "emoluments as pay."

It appears that the law has been changed since 1914, and that a petition of this kind must contain names equal to 15 per cent of the vote cast in a city at the last general election for governor.

It is claimed that the extra 108 signers could be secured in a few hours, and that the small technicality of a few days less than the 60 required, will not "figure."

It was learned today that six petitions were circulated yesterday and that more than twice the number of signers were secured.

The minor legal technicalities will be easily overcome, say eminent attorneys, and the charter amendments will go on the November ballot.

## Hetchy Hetchy Dam Nears Completion

The completion of the Hetchy Hetchy reservoir and dam will take place about December 15, it is stated. The dam and reservoir when completed will have cost \$5,500,000.

## Oakland Week Next On the Boosters Program

Oakland, Sept. 15.—Sponsored by the merchants and business men "Welcome to Oakland Week" will start Monday and continue until Saturday.

During the week 125 business men will offer to eastbay residents what is declared one of the greatest assortments of merchandise ever assembled in the west.

As officially outlined and announced, the object and purpose of the meeting is to have a great community get-together that the people of the eastbay may become better acquainted.

Big crowds from every city in Alameda and Contra Costa counties are assured.

## Arbuckle in Japan; May Stay in Orient

Tokio, Sept. 15.—Roscoe "Pat" Arbuckle, once popular American film comedian, who has been in a hospital since his arrival here, is fully recovered and is ready to engage in his profession. It is said his pictures are popular with the Nippon population.

## Schools to Close For Institute Week

Teachers' institute convenes in Oakland beginning with the week Monday, October 16.

The schools will close Friday, October 13, for one week.

The parent-teachers association will meet with the teachers during the week.

## PHYSICAL CHEMISTRY

Lectures given recently at various American centers of learning by Dr. F. W. Aston of Cambridge made a notable contribution to the general knowledge of the remarkable advances of the moment in physical chemistry. More and more it is coming to be taken for granted that the chemical elements are made up of identically the same stuff, and that they differ only in their structural arrangements. More and more the passage from one element to another which has so dumfounded science when it was first observed taking place spontaneously is coming to be a matter of course and something which we may ultimately hope to control.—Scientific American.

## AWKWARD FOR THE DOG

His dog was a nice Airedale, which could whip and had whipped, every other dog in the neighborhood. Then he clipped its coat. "Yes," he said to a friend, "the clipping was my own idea. I believe it made him look better. But it was very awkward for the dog."

"How was that?" asked his friend. "Oh, the other dogs didn't know him, so he had to fight 'em all over again!"—Sheffield Telegraph.

## NO WORRY ABOUT COAL

People in 2,100 residences in Tacoma, Wash., are not worried about the coal strike. Their houses are satisfactorily heated by electricity from the municipal water power plant in one of the largest experiments of domestic heating by electricity in the country. The city finds the arrangement profitable, as the domestic use in the morning and evening hours supplements the industrial demand, which is largest from 8 a. m. to 4 p. m., and saves power.

The Curry-Donnelly recount for coroner has been dropped.

First ladies' night of the season this evening at the Elks club rooms. Ed. Dale, chairman.

Today is the last day of the quarter to pay your income tax.

## User Can Improve His Own Telephone Service

Naturally everyone who uses the telephone desires a continuous and efficient telephone service. There are many little ways in which telephone subscribers can assist the people in their efforts to provide service.

For instance, a simple knot in your telephone cord is apt to cause a break in the service. The knot weakens the delicate wires contained in the cord.

If the cord rests against a wet umbrella, or on the sponge on the desk or against any other wet object, telephone trouble may follow.

Thousands of trouble complaints arise from such incidents. By taking care to avoid such troubles, the telephone user will benefit by having a continuous service while the company will be able to use its repairmen and materials for other greatly needed work.

Don't leave the receiver off the hook when through talking. Don't allow it to rest on a book or other object when hung up. In Connecticut in one year 32,000 "troubles" were caused in this way.

When the receiver is left off the hook or resting on a book it means to the operator that the telephone is in use and it cannot be reached by any other subscriber until the condition is corrected.

## P. G. & E. Power Tunnel Tried Out

Sisson, Cal., Sept. 15.—The P. G. & E. Co. have tried out Pit No. power plant by diverting part of Fall river through the Roland tunnel and starting one of the big turbines in Pit No. 1 power house. It was found in the tryout that the intake, dam, tunnel, surge chamber, penstock and turbine all functioned in perfect harmony.

Formal opening of Pit No. 1 will take place in two weeks.

## Elks to Picnic September 24

Elks picnic at Ramona Park to be held Sunday, Sept. 24, promises to draw a large crowd.

Chairman John A. Bell of the transportation committee made the announcement that provision would be made for all Elks and their families who do not have machines.

There will be a barbecue and good eats, dancing, etc.

## Books For East-Enders

A deposit station of the Richmond public library was opened yesterday at the Venus confectionery, Macdonald avenue and 23d street. Mr. Engleman will be in charge.

A collection of 250 books has been placed in Mr. Engleman's store and may be borrowed by any registered card holder.

For the present books may be returned and borrowed at any time during the open hours of the store. There will be no reading room in connection with the branch.

## Fred Hilton Up Again

Fred Hilton, who not long ago had an interesting "scence" with Judge Edgar of Berkeley for burning up the macadam, was "nicked" \$100 and given a 90-day suspended jail sentence for reckless driving by Police Judge Clarence A. Odel, yesterday.

When we refer to basic paving materials, it is understood that "taxation," and "paving" are virtually synonymous terms.

## Hiker A. H. Poage Is In a Class by Himself

A. A. Poage of Richmond is conceded to be the champion hiker and explorer of Contra Costa county.

His annual trips through the valleys or to the snow crests of the Sierras are of the variety that produce the tan and also "muscle up" the pedals.

Poage is usually accompanied by one or two of his family, having two husky grownup boys who delight in accompanying their father on these outings, the mileage of which always runs strong into three figures.

The senior Poage related the experiences of their recent trip to Mt. Whitney at the men's class the other night at the Presbyterian church.

"It was great, and my feet were itching to hit the 'pike,'" said our reporter, who was assigned to get Poage's story.

Poage told how to pluck the "feathers" from a rabbit and have him in the pan and over the campfire in a jiffy.

He did not favor the flat rock nor the forked stick. They are not always obtainable for cooking purposes, notwithstanding Joe Knowles' "recommendations."

How to make a bed of pine boughs and a pillow out of a pine chunk, amused the "boys" who have it soft at home.

He told how to combat snake and mosquito attacks, and their bites. He dwelt on the chigger, who borrows his head in man's cuticle, and with his rear legs dangling, bores in and holds on. Poage recommends Zerolene for this pest, and said one application will often cause the chigger to "back up."

But Mr. Poage does not wish the reader to construe this as an advertisement for his company, the S. O.

He would impress all of us with the health-giving qualities of Mr. Shanks' ponies, and also by inflating our lungs with 100 per cent pure air.

The Joe Masching trial was postponed.

## Fry Property Is Being Improved

(Albany Argus)

Mr. and Mrs. Fry came over from San Francisco Monday to look after their property interests at the northeast corner of San Pablo and Main. Their property fronts 55 feet on San Pablo and 72 feet on Main.

The movie theatre property has recently been improved, and the new lessee intends to make a first-class show-house out of it. The Frys have built a new addition on to the corner store occupied by G. A. Bittick, which will be occupied by a barbershop and pool room.

## Fire Chief Scudero Recovers Man's Body

Fire Chief Charles Scudero, whose reputation for recovering human bodies from the waters of the bay region is widespread, was called to Martinez Monday to search for the body of L. F. Clough, a Shell Oil company watchman, who fell from the pier at that point Sunday afternoon and was drowned. Scudero was accompanied by Jack Royce, and at the conclusion of several hours' work the men were successful in bringing to the surface the object of their quest. The drowned man is survived by a widow and three children.

## West Macdonald Ave. Continues to Improve

Gill, Chemical Co. and  
Dupont Assessments  
Adjusted

(Albany Argus)  
The city board of equalization completed their business for the year last night (Thursday), fixing the assessments of the Gill and Dupont properties.

The Gill assessment was raised \$14,000 over last year, which makes a total of \$142,000.

The Dupont Powder Co.'s assessment was raised \$3500, a total of approximately \$75,000.

The Fleming Point property was assessed at approximately \$80,000 for the 55 acres, most of which is valuable industrial property lying idle waiting for the manufacturing districts of West Berkeley and Richmond to meet and jump this land to fabulous prices. It is true the land at present is returning no income, but taxes are based on values.

The tax rate was fixed at 90c, apportioned as follows:

General ..... 83c  
Fire ..... 4c  
San Pablo avenue ..... 3c

Total ..... 90c

There were no provisions made for street improvements. A bond issue or assessment district will be the only way. Abutting property, in case of assessment plan, must pay the bill.

## Republican County Central Committee

Martinez, Sept. 15.—At a reorganization of the republican county central committee meeting here John F. Galvin, publisher, was elected chairman; A. A. Alstrom, secretary; A. F. Bray, treasurer.

C. S. Hannum and Arthur Burton were named as delegates to the republican state convention which convenes at Sacramento next week.

## Laufer the Optician Says

A man's success depends on his mental and physical efficiency, which in turn are largely dependent on good eyesight. 70% of us have defective vision and don't know it. Don't guess any longer—know! See an optical specialist. F. W. Laufer, Optometrist and Optician, 487 Fourteenth street, Oakland, California.

Hinkelmann to Build  
On Old Dewey  
Location

All a building boom requires is a start. Then there is an "awakening."

H. L. Hinkelmann of San Francisco came over Wednesday to take a look at his Macdonald avenue property between Second and Third, where the old Dewey restaurant once stood, famous for its oyster loaves.

When Hinkelmann saw the improvements within a few feet of his property, he concluded to build thereon.

By closing this gap the entire south side of Macdonald between 2d and Third will be built solid.

Hinkelmann is a heavy taxpayer and owns some of the best income property in Richmond, the southeast corner block at Seventh and Macdonald, including Billy Logan's old Bank Bar stand, being some of it "worth mentioning."

## Brun's Store Rooms Ready For Tenants

The three fine store rooms at the southwest corner of Third and Macdonald are receiving the finishing touches and in a few days will be occupied by tenants. It is said a shoe store and furniture emporium will occupy two of the rooms and a drugstore and fountain the third one.

## Ninth St. Apartments

A building permit has been issued for a 2-story frame store room and apartment building between Bissell and Chausser on 9th street. The building is to cost \$3000, and is to be erected for Simon Phillips.

## "Reveille" Boys Come to Town

Harold and Eddy Bradshaw of the Cloverdale Reveille came down from Cloverdale today after printing their paper, to spend the week-end visiting old friends and "seeing the sites."

Both are former Richmond high school boys and attaches of The Terminal.

THE RICHMOND TERMINAL, is the oldest newspaper in Richmond.

## Indigestion and Dyspepsia Overcome

Victims of stomach trouble, indigestion, dyspepsia and their allied complaints find Tanlac an ever-ready source of relief and comfort. Thousands of people have found the joys of health by its use after everything else they tried had failed.

"Tanlac helped me wonderfully," said Mrs. W. H. Hocker, 54 Rose Ave., Clifton Forge, Va. "For over a year I suffered, tortured from indigestion, and had to live on the simplest foods. I became almost a nervous wreck. Tanlac restored me to the best of health."

Tanlac helps the stomach digest the food properly and eliminate waste. Soon the whole system is built up, the blood is purified and the entire body takes on new tone, vitality and energy. Get a bottle today and start on the road to health. For sale by all good druggists.—Advertisement.

**She Changed Her Mind.**  
A gentle-minded Cleveland woman, arriving in New York one day, gave the porter at the station a dime. The porter in a fury threw it on the ground. The Cleveland woman picked it up. At the same time she explained gently that this was the only coin she happened to have in her purse, and in parting with it for a tip she had condemned herself to walk two miles to her hotel instead of taking the bus.

This explanation mollified the porter. "In that case, lady," he said, "I'll take the tip."

"No, never mind," said the Cleveland woman in her gentle way. "I think I'll take the bus."—Cleveland Plain Dealer.

**An Interested Onlooker.**  
"Have you seen Zeke Dawdle lately?"  
"No," said Squire Withersbee, "but Zeke's making his headquarters down where they're puttin' up a new store."  
"Is Zeke working at last?"  
"No, it ain't that serious. Zeke's kinder superintendin' th' job, along with several other gents whose wives run beerin' houses. If th' workmen were to lay a brick or raise a girder without Zeke seein' it done it would spoil his day."—Birmingham Age Herald.

**Freehen a Heavy Skin**  
With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Advertisement.

## DAIRY POINTS

### IMPORTANCE OF ICING MILK

Product Delivered at Night Often in Greater Need of Ice Than During Day Time.

(Prepared by the United States Department of Agriculture.)

Some milk distributors who would not think of sending out loads of milk during the day without icing do not ice the milk delivered by their wagons to the consumer's doorstep at night, styling as their reason that night deliveries are more rapid. The United States Department of Agriculture, in a recent statement, calls attention to the fact that milk delivered to the consumer's home at night often is in greater need of icing than that which is delivered during the day.

The important consideration, says the department, is the time elapsing between taking the milk from the plant until it is placed in the consumer's refrigerator. The fact that the dealer delivers it quickly does not mean that it will reach the refrigerator quickly. Bottles delivered at the door usually are not taken in until after the sun has been up for some time.

During the summer months it is very important that milk on delivery wagons be well iced. When milk is liable not to be taken in at once, it should arrive at the doorstep at a temperature of 50 degrees F. or lower. If the ordinary open-bottom cases are used and stacked not more than two high, it is necessary to ice only the top row, as the cold air will pass down to the others. Ordinances, says the department, may well prohibit the delivery of milk at a temperature higher than 50 degrees F.

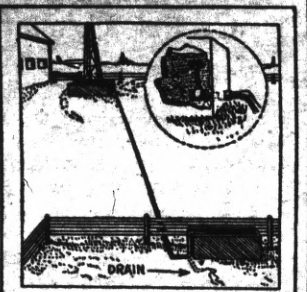

Consumers may help by placing a properly insulated container on the doorstep, in which the milkman may put the bottles of milk.

### SIMPLE WATER SYSTEM PLAN

Time and Work Saved by Constructing Drinking Tank in Pasture to Supply Cattle.

In order to save time and work I figured out a plan whereby I was able to eliminate the necessity of bringing the cattle from the pasture field into the barnyard where the water-supply tank was located each time they needed a drink.

I bored a 1½-inch hole near the bottom of the large tank, putting a nipple through it; then I connected the nipple on the outside of the tank with a coupling to a pipe which ran

Water System Saves Time.

a distance of 200 feet to the pasture field where I had placed a small drinking tank, the water running into the small tank through a goose neck on the end of the pipe. Inside the large tank I placed a globe valve so when shut off there was no chance for the water to freeze if the supply tank were kept full. The goose neck was laid over flat by pivoting at the lower elbow, thus draining the entire pipe. A ¾-inch pipe would have been just as satisfactory for this system but as I had the 1½-inch size on hand I used it.

Of course, this system naturally requires an incline in the distance between the two tanks.—D. G. Beatty, in Power Farming.

### KEEPING RECORD OF LAYERS

By Means of Contest It Is Hoped to Gain Facts for Selection of Better Stock.

The first one-year egg-laying contest in Indiana began March 1 in Clay county, the United States Department of Agriculture has been advised. One hundred hens of several of the Mediterranean, American and English breeds from several farms in the county have been assembled at one farm. Before establishing the hens in their new home a record was made of all their characteristics. As the contest progresses the records of the hens as layers will be compared monthly with their physical characteristics. It is hoped by this means to obtain facts for the selection of more profitable stock.

### Must Feed Cow Liberally.

It is a good performer a cow needs a generous ration of hay and grain, and the excess over mere maintenance measures the capacity of milk production.

### Go Back in Production.

Cows milked by the calf from year to year go back in their producing capacity instead of improving it.

### Roughage for Calf.

Provide all the good clover or alfalfa hay the calf will eat up clean.

## Uncover Ancient Colombian City

Explorers for Field Museum Find Place That Was Once a World Center.

### ITS POPULATION WAS IMMENSE

Inhabitants Were Expert Builders of Houses and Roads and Were Skillful in Making Gold Ornaments.

Chicago.—Ruins of an ancient city of great size, hitherto unknown, have been uncovered in Colombia by the South American archaeological expedition of the Field Museum of Natural History, working under the leadership of Dr. J. A. Mason. The ruins of the city, or collection of villages, are in a portion of Colombia now uninhabited and almost unknown to science. It is evident, the museum announced today, that this was once one of the great centers of population of the world, but today even its name is unknown.

The finds to date indicate that in ancient times the country was densely inhabited by settled agricultural tribes who were semicivilized. They were expert builders and possessed great skill in the working of gold and precious stones.

**Ancient Population Tremendous.**  
Mr. Mason sent the following message regarding the discoveries he has made thus far:  
"There must have been a tremendous population here at one time, as the

country is covered with house sites. The region is very mountainous, and the houses, which were of wood, were built on terraces made with retaining walls. In the center of each terrace there are entering steps of beautifully cut stone, and, if the main path is far below, other steps are built to connect the terraces with it.

"The principal place where I have been working has a long staircase of 48 steps, all made of nicely cut quadrangular stone slabs. Instead of the Indian road of which I have heard, there are thousands of them all through the mountains. There are apparently wide roads connecting the main sites.

**Roads Skillfully Built.**  
"All are paved with flat waterworn rocks of more or less uniform size, the small paths being a single line of such stones, while the more important roads are four feet or more wide and edged

with upright stones. When the way ascends or descends the stones are set as steps.

"On the side of almost every house there can still be found the remains of grinding slabs, on which the family ground its corn. In all the villages we have found quantities of broken pottery, mostly fragments of large undecorated jars. Some were decorated with relief ornaments and there is one sort of very fine black pottery which is incised or carved."

The ancient inhabitants of this country decorated themselves with gold ornaments and buried these with their dead. The early Spaniards are known to have taken fabulous quantities of gold from the ancient graves and the further work of the expedition should bring to light many objects of value and interest, it was said.

Specimens already received at the museum include gold bells, small beautifully made gold figures and ornaments of shell, carnelian and agate. The most valuable acquisition is a complete set of ornaments worn by a native priest in the performance of his religious duties. The expedition is supported by the endowment of research given to the museum by Capt. Marshall Field.

## Miracle Healer of Porto Rico

Julita Vasquez Attracts Immense Throngs to San Lorenzo Every Week.

### CRIPPLES CROWD THE ROADS

Healing Waters Come From a Spring But They Don't Work Until the Woman Has Blessed Them.

San Juan, Porto Rico.—Extra policemen have been detailed for duty at San Lorenzo to help handle the crowds drawn there from Wednesday night to late Friday each week by the stories of apparent cures by Julita Vasquez, the "healer of San Lorenzo."

Hundreds, if not thousands, of automobiles carrying the sick, lame and curiously have been visiting San Lorenzo, and so great have been the traffic jams that there have been complaints to the police that the San Lorenzo road was impassable. On a recent Thursday there was a line of motor cars two miles long on each side of the roadway waiting for people who are rapidly wearing into a broad trail the cow path that leads up the steep hills to the spring from which the supposedly healing waters come.

Thousands go by motor to the "heal-

er" and more thousands on foot. From Caguas and other nearby towns there has sprung up a regular motor service to and from the place of "miracles." People go by truckloads. They go in carriages, carts and some are carried. Stories of "miracles" are spread with wonderful rapidity through the crowd each day, and there are reports of people coming from Santo Domingo or the Virgin Islands to get the waters blessed by the "healer." Some make a fiesta of it; others are almost reverent.

The healing spring is about a mile from the town where the "healer" lives. Near the spring a palm-covered pavilion sheltering 400 to 500 people has been erected. There Thursdays and Fridays the healer sits in a chair on a raised platform and receives the sick.

**She Magnetizes Water.**  
Waters from the spring last healing qualities until she has blessed or magnetized them. After being blessed the water is carried away in bottles, buckets, oil cans, anything. And each person the "healer" sees is told to bathe, rub the afflicted portion of the body with the water, or drink as much of it at certain times.

Frequently the "healer" is aroused from her trances with great difficulty. Her father and a brother assist her. Her "power" is supposed to have been passed on to her, while the spring waters for many years have been reputed to have healing qualities. It was about two months ago that the "healer" first attracted attention. Since then her fame has spread throughout the island.

### LIVED MORE THAN 100 YEARS

Tennessee Told at Nineteen That He Would Die of Tuberculosis in Two Years.

Nashville, Tenn.—John B. Murray of Franklin, Tenn., a farmer, was told at the age of nineteen years he would die within two years of tuberculosis. But he has celebrated his one hundredth birthday. His grandchildren and great-grandchildren, together with a great part of the population of Williamson county, joined in honoring the centenarian at a monster birthday picnic.

Murray declares he has never gambled, danced or attended a theater. He never drinks intoxicating liquors except for medicinal purposes, and says that altogether he has never drunk more than half a gallon. He smoked cigars for a while to cure neuritis, he says, but they made him so nervous he had to quit.

Murray was a kinsman of President James Buchanan, and was acquainted with James K. Polk, Andrew Jackson, Grover Cleveland and Andrew Johnson.

Path is beautiful and idealistic, but fact is the boy that does business.

### Agamemnon, too, may soon meet a successor.

She is a moving target, more difficult to hit than Superb, which is stationary. She is propelled by oil. The supply of oil is turned on, her engines are started, and the engineers flee from her before she gathers too much headway. Her speed as well as her steering apparatus are controlled by wireless in another ship.

The most exciting part of these tests is that played by the sleep Snapper. She is responsible for taking accurate motion pictures of what happens to the target as the result of the attack. At times she runs the risk of being hit by the monster armor-piercing projectiles, as well as being rammed by the 20,000-ton Agamemnon.

### One Mail Coat for Force.

Berlin.—Voets of mail have been adopted for German detectives engaged in dangerous pursuits of criminals, but because of a shortage of funds the Berlin department can own but one of the useful vests of armor. As a result this will be passed around in turn to men engaged in following desperate criminals.

## POULTRY

### FEEDING PIGEONS IN LOFTS

Most Popular Method Is to Have Stated Hours for Placing Grain Supply in Troughs.

Self-feeding hoppers are seldom found nowadays in the lofts of veteran pigeon breeders. Their argument is that they have not found it profitable to have several days' supply of grain within reach so the birds may help themselves at will. There are two reasons for this. First, inferior squabs are raised in lofts where food is constantly before the birds, as there is no regularity among the breeding pigeons in feeding their young; second, this continual picking at the grain eventually leads to poor appetites, resulting in the squabs suffering.

Another disadvantage in having feed lying around is that it attracts mice and even rats, and when once these enemies are in a loft there is great loss of young birds.

The most popular method for feeding is to have stated hours for placing the grain in the troughs. These

Loose Grain in Pigeon Lofts Attracts Mice and Rats.

troughs are placed in the center of the floor, so that there will be plenty of room for all the birds to gather around it. Galvanized iron drinking vessels are preferred to stone fountains.

There are three open boxes in each loft, measuring 12 inches in length, three inches in width, and three inches in depth, and these boxes contain oyster-shell, grit and charcoal.

A bathtub is placed in the aviary of each pen. These are made of galvanized iron and of convenient size for handling. During the winter the birds are given a bath about once a week, but only on bright clear days. In summer it may be given twice a week. These pans are filled about eleven o'clock in the morning and allowed to remain for about two hours, when they are emptied and turned upside down. If the water is not emptied shortly after the birds are through bathing, they may drink of it and become sick.

### LIME OF GREAT IMPORTANCE

Mineral Element Is Essential for Egg Production and Development of Young Chicks.

Provision for an adequate supply of lime in the ration should be made by poultry raisers, for if this important mineral element is lacking in the food a drain is made on the reserve supply in the bones and soft tissues of the animals which interferes materially with egg production in mature hens and in the proper development of the growing chicks.

### BIG VALUE OF ANIMAL FEED

Experiments Made at Purdue University Showed Great Increase in Egg Production.

Animal feeds have a decided value in the ration of laying hens and pullets. Experiments made by the Purdue University showed an average egg record of 140.2 eggs in a year from a pen of pullets fed skim milk; 135.5 eggs from those fed meat scrap; and 61.2 eggs from those that received no animal feed of any kind.

## POULTRY NOTES

If your chicks are not doing well something is wrong. Look out for lice and for worms in the intestines.

All cockerels that are not to be used as breeders should be marked as soon as they weigh about two pounds.

A two-pound bird will sell for as much now as a four-pound bird two months later.

The sex of geese is best distinguished by size and voice. Ganders are somewhat heavier and have harsher voices. It is the ganders that bite when they are attacked or annoyed.

Sweet milk in abundance is highly desirable. Milk-fed fowls usually bring a premium on the markets and have a better flavor than those fed on fattening rations moistened with water.

## MRS. LULA VANN FULTON, ARK.

Suggests to Suffering Women the Road to Health

Fulton, Arkansas.—"I used Lydia E. Pinkham's Vegetable Compound for a soreness in my side. I would suffer nobly every month from my waist down that I could not be on my feet half the time. I was not able to do my work without help. I saw your Vegetable Compound advertised in a newspaper and gave it a fair trial. Now I am able to do my work and don't even have a headache every month. I cannot praise your Vegetable Compound enough and highly recommend it to those who have troubles like mine. I am willing for these facts to be used as a testimonial to lead all who suffer with female troubles, as I did, to the right road to health."—Mrs. LULA VANN, Box 48, Fulton, Arkansas.

In this sort of praise of Lydia E. Pinkham's Vegetable Compound, given by word of mouth and by letters, is to be noted another, that should cause you to consider taking this well-known medicine, if you are troubled with such symptoms as painful periods, weak, nervous feelings, miserable pains in your back, and cannot work at certain times.

Here is a woman who is so grateful and glad to be relieved from a painful and nerve-racking physical condition that she wishes to tell all sick women.

## Laxatives Replaced

By the Use of Nujol

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and does not place it. Try

If candles were made in the shape of a cross some people would burn them at all four ends.

The spectator often sees better than the actor.

The most uncommon thing is common sense.

## Backache Is a Warning!

Those agonizing twinges across the small of the back, that dull, throbbing backache may mean serious kidney weakness—serious, if neglected, for it may lead to gravel, stone, the kidneys, bladder inflammation, dropsy or fatal Bright's disease. If you are suffering with a bad back, have dizzy spells, headaches, nervous, independent attacks or disordered kidney action, heed Nature's warning. Get after the cause. Doan's Kidney Pills have helped thousands. They should help you. Ask your neighbor!

**A Utah Case**  
Joseph Mathias, retired farmer, 82 Second St., Brigham City, Utah, says: "I suffered from severe attacks of backache. So many times it was hard for me to get up from a chair or from a stooped position. My kidneys caused me more or less trouble, too. I used Doan's Kidney Pills and in a few days the backache left and my kidneys became normal."

Get Doan's at Any Store, Or at Box DOAN'S KIDNEY PILLS, POSTER-MILBURN CO., BUFFALO, N. Y.

## Women Made Young

Bright eyes, a clear skin and a body full of youth and health may be yours if you will keep your system in order by regularly taking

The world's standard remedy for kidney, liver, bladder and uric acid troubles, the essence of life and looks. In use since 1895. All druggists, three sizes. Look for the name Gold Medal on every box and accept no imitation.

## THICK, SWOLLEN GLANDS

that make a horse Whinny, Roar, have Thick Wind or Choke—Doan's can be reduced with

also other Doan's Remedies. No matter, no hair, nose, and horse kept at work. Economical—only a few drops required at an application. \$2.50 per bottle delivered. Doan's & Co. W. F. Young, Inc., 310 Temple St., Springfield, Mass.

## Entertaining Hildegarde

By JANE OSBORN

(© by McClure Newspaper Syndicate.)

The telegram came on the 10th of June. The dance was set for the 15th. Hildegarde Blaxton opened the yellow envelope at dinner and read: "Can you come to senior dance on the 15th? Must have you. Tom."

"What is it, daughter?" asked Mr. Blaxton, and Hildegarde blushed, and then blushed more furiously through vexation with herself for blushing.

"It's an invitation from Tom Frohisher to the senior dance. I would love to."

"But the railroad fare alone would cost \$50," exclaimed an elderly sister. "I thought Tom was only a junior."

"He must be a couple of years younger than you," said Mrs. Blaxton, with an air of one who merely seeks information.

"He's not a whole year younger," she said and then: "But what difference does that make?—just because you go to a dance with the man doesn't mean that you're going to marry him."

"Well, I don't understand at all," sighed Mr. Blaxton. "The nerve of young men of today who expect a girl to spend hundreds of dollars on carfare to go to dances with them and then don't intend to marry them—"

"Fool," scoffed Hildegarde. "Maybe the young men want to marry the girls, but maybe the girls won't have them— If I went to this dance with Tom Frohisher, I should go because I haven't been anywhere all winter or spring. It would do me a lot of good. I'd see all the old crowd and meet some new people. It wouldn't be because I expected to marry Tom Frohisher—necessarily."

"All I have to say, then," said Mr. Blaxton, "is that I shall not finance the trip." So saying he finished his small cup of coffee and followed his wife's lead to leave the table.

"That night before Hildegarde retired she went to her father."

"I think I shall go to the dance with Tom," it will cost only \$100. I have clothes enough on hand. I shall spend that \$100 I earned tutoring the Bailey children. You don't object, of course? There are chaperones as soon as we get there."

"When a girl of today announces her plans," said Mr. Blaxton, "a more father has nothing further to say."

So Hildegarde's acceptance of Tom Frohisher's invitation and not been rose strewn from the first. For the last 50 miles of her trip Hildegarde forgot the spirit of rebellion mingled with regret that spoiled her peace of mind, in the company of Dudley Barr, whom she had met at a house party a year before and who now was counted as one of the most brilliant young men on the faculty of Frohisher's college.

At the station they parted, Dudley to hurry off with a very polite doffing of the hat and Hildegarde to be met with effusive and rather spectacular greetings by Tom Frohisher.

It was the day before the dance that evening there was a little acquaintance dance at the frat house. Following tradition, Tom Frohisher took Hildegarde to Neal's for tea in the afternoon.

Dudley Barr chanced to be at Neal's—not indulging in afternoon tea, but indulging his sweet tooth with pastry and incidentally making observations on the students on parade who always amused him.

He caught sight of Tom Frohisher and Hildegarde at a small table and then, to his surprise, saw Tom rather ungraciously leave Hildegarde to go to speak to a group of young people at a table next to his.

Elaborate greetings were exchanged and Tom regarded the overdressed flappers there with manifest approval. "Who's the peach with you?" asked one of the men.

"Oh, that's Hildegarde Blaxton." "I thought your best girl's name was Rose," teased one of the flappers.

"Maybe Rose is my best girl," boasted Tom Frohisher, "but there has to be a second best, you know. Rose was coming, but the last thing her dad held up the funds. She lives way out in Fresno. But she's coming next year, if she has to walk. That's what her telegram said."

"She'll have to look out," sneered one of the overdressed flappers, "for the charming Hildegarde will ramp you away."

"Sweet chance," promised Tom Frohisher, and then strutted back to Hildegarde.

Dudley Barr lingered long over his pastry. Then, when Tom and Hildegarde had risen from their table and Tom had gone ahead to settle his account at the desk, Dudley strode quickly to Hildegarde's side.

"Miss Blaxton," he said without much ceremony, "will you go to the baseball game with me tomorrow afternoon?"

Hildegarde looked around anxiously to see if Tom were overhearing. "I should love to, but isn't it customary for the man who asks a girl to a senior dance to take her to the baseball game, too?"

"It certainly is," agreed Dudley. "But I happen to know that Mr. Frohisher has to work all the afternoon in the laboratory. So you will be free, if you choose, to go to the game with me."

"Then I should be charmed." And Dudley Barr moved away as Hildegarde and Tom Frohisher met and

pushed their way past the incoming crowd at Neal's.

They walked leisurely back to the fraternity house. In the meantime Dudley Barr made haste, for he had an important note to write.

"Hang it all," said Tom, after glancing at an official-looking note that was waiting for him at the frat house. "That sorcerer Barr has tied me up for the afternoon tomorrow. I had to make up some lab, but I thought he was going to let me off. Now comes this note to say that I've got to make up three hours in chem before he'll let me through that course. And I passed his written aid exam. I call that dirty work, I do."

Hildegarde looked puzzled. "Is that the first notice you have had?" she asked.

"Yes," said Tom, "and it's just at the time of the game. But, hang it all, I'll cut it. What does credit in that course compare with going to the ball game with you? Say, Hildegarde, you don't think I'd pass up going to that game with you for all the credits in the world, do you?"

"If you think as much of me as that," blushed Hildegarde, "please do the laboratory work. Do it for my sake."

"Pretty said," said Tom. "Perhaps I had better see it through."

So he went to the laboratory, alone save for a plucked-faced assistant whom Dudley Barr had left to watch, Dudley sat beside Hildegarde, and students and their girls who knew Tom Frohisher, and had seen him with the striking Hildegarde, looked on and wondered.

Just behind Dudley and Hildegarde as they were leaving the stadium walked one of the students to whom Tom had conversed the day before at Neal's.

"Tough on Tom," commented the student, looking ahead.

"But it isn't as if she was his very best girl," said the overdressed flapper, "and then, as they had passed safely beyond Hildegarde and Dudley Barr, she added: 'I said that loud on purpose. I wanted that Hildegarde person to hear. I think she's a perfect cat to go off with that professor when poor Tom is working in the lab.'"

And Hildegarde had heard, and so had Dudley Barr, but neither made any comment. But when Dudley Barr asked Hildegarde if she would let him see her off at the station the day after the dance Hildegarde assured him that she would be glad to do so.

After effusive farewells Hildegarde boarded the train wondering where Dudley Barr would be, and then Dudley appeared. "It just happened that I was leaving on the same train. You won't object to letting me have my seat changed to this one beside you?"

So Dudley traveled on with Hildegarde, and Hildegarde wondered at the time why Dudley did not leave within an hour of the time due to arrive in her home town Dudley became very serious.

"Hildegarde," he said, "I arranged affairs so that I could come home with you. I wanted to ask you to marry me. I wouldn't poach—you know that. If you really cared for Tom Frohisher or if he was worthy of you—I would have kept my secret to myself. If you will let me I'll go home with you so that I can present myself to your father and mother, and do the thing in the good old-fashioned manner."

"Oh, I am so glad," breathed Hildegarde. "Father is very old-fashioned. I know he will approve of you."

**HAVE THEIR FOOD DELIVERED**

Nature Has Arranged It So That Sand Fiddlers Find Little Difficulty In Subsisting.

The houses of the agile and lively sand fiddlers are burrows dug out along the ocean beach just below the high-tide line, and extending downward a foot or more at a very steep angle.

When the tide comes in, they crawl into their burrows and the beating of the waves soon stops their doors with sand. When the tide has begun to ebb and leaves the wet beach, they dig themselves out and toddle down to the water's edge.

Each wavelet of the receding tide carries up on the beach a tiny "windrow" of sand. There is, however, much more than sand in this windrow. Among the sand grains are caught and left countless numbers of microscopic plants and animals that dwell at the surface of the sea. The fiddlers walk along the "windrows" as they are formed, and with the spoon-shaped tips of their smaller claws or hands scoop up the food-laden sand and stuff it into their mouths as fast as they can.

At meal times the females have a notable advantage. Both their hands have spoon fingers, enabling them to eat twice as fast as the males.

**Land Vertebrates of Cool Era.**

The land vertebrates of the cool era were amphibious animals, half-reptiles, half-fish. Bones and skeletons of the Eryops, the largest and best known of these amphibians in America, are occasionally found in the upper part measures of Pennsylvania, but the best specimens are from Texas.

The Eryops is twice as old as the Brontosaurus, five times as old as the Ichthyosaurus, the distinctive ancestor of the horse—one hundred times as old as the mammoth or the mastodon or the earliest known remains of man.

It has been said of the Eryops that he is a collateral ancestor of all the higher animals—of reptiles, birds, mammals, and of man himself—all developed through the ages which have since elapsed from animals of the same type and grade of organization.

## WASHINGTON CITY SIDELIGHTS

### Plan Adequate Air Defense for Nation

WASHINGTON.—Air experts of the army and navy have worked out a comprehensive plan to provide an adequate air defense for the nation, which is in form for submission to congress as soon as it is finally approved by executive heads.

The experts have proceeded on the theory that congress would not in this time of stringency and economy, entertain a plan which called for an immediate outlay of an enormous sum of money and construction at one time of from one to two thousand planes of all types. Their program, therefore, is of the progressive type extending over several years, patterned after the navy's 1919 shipbuilding program.

"The American program, as tentatively drawn up by the army and navy experts, contemplates the following: Provision for enough new planes to enable the army air service to have 500 machines on each coast and approximately 1,000 planes at strategic points in the interior.

Detail of 2,500 officers and 40,000 men to the air service.

Construction of between 250 and 300 new airplanes for the two huge aircraft carriers into which two of the treaty-doomed battle cruisers are being converted.

Equipment of every fighting ship and many of the auxiliaries with an airplane, catapult, and whenever possible, landing gear, something like 300 planes being needed for this.

Quantity production of the deadly torpedo plane of the all-metal type, as soon as the experiments being carried out demonstrate the most suitable type for use on ships.

A systematic development of landing fields at seaports for the fleet, and the landing fields along definitely laid out aerial lines all over the country.

**Senatorial Elections May Cost a Lot**

LIKELIHOOD that candidates for the senate will enter the fall elections without federal regulation of their campaign expenditures has become greater, due to the situation created by the senate.

The Newberry case will be forgotten so far as limiting expenses this fall is concerned. Those few senators who are insisting that congress should take prompt action to provide an alternative for the invalidated corrupt practices act will not be permitted to address the senate on the subject except by unanimous consent for several weeks.

Adoption of a special rule giving the tariff the right of way from now on was coincident with the departure from Washington of Senator Spencer without having made an effort to call together the subcommittee of which he is chairman and to which bills aiming to put an end to the senatorial campaign fund scandal have been referred.

Despite these discouragements, sponsors of the movement to prevent riotous campaign expenditures were not dismayed. Senator Borah discussed his plan for a concurrent resolution with leading senators, while Senator Pomeroy intends to ask unanimous consent to consider the matter. Failing in that, he will address a letter to Senator Spencer on the subject urging action in the name of "political decency."

Senator Borah is equally determined to force consideration of his measure and will demand action in some form or other.

In the meantime, the preliminary work of campaigning is going on in the various states and reports are already being received at the capital of heavy expenditures of money, actual and contemplated. One candidate for the senate is quoted as saying he is prepared to spend \$500,000 if necessary and is already engaged in an extensive form of campaign advertising, including billboards and phonograph records.

**Notables to Be Missed From Next House**

retire this year is James Warren Fordney of Saginaw, present chairman of its ways and means committee. Fordney will have served twenty-four years in the house.

Congressman Ira C. Copley of Illinois was the first of the important coys in the house machine under the new administration to go down to defeat in the primary.

Along with Copley went Congressman Clifford Ireland of Florida, who is chairman of the committee on accounts.

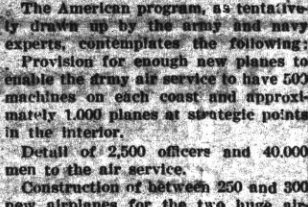

The greatest loss suffered by the elder statesmen was the defeat of Congressman Phil Campbell of Kansas, chairman of the rules committee. He also was the ranking member of the committee on Indian affairs and the ranking member of the select budget committee.

The house rules committee, in fact, is "all shot to pieces" already. Three of the high members will not be seen in their places next spring. Besides Campbell, Congressman William A. Rodenberg of Illinois and Congressman Vess of Ohio are out. Rodenberg voluntarily retired with his present term and Vess has given up the bid in the hunt for the senatorial campaign in Ohio.

**Smoot to Harrison on Sugar Charge**

THERE was an unusual occurrence in the senate the other day, growing out of the charges of Senator Harrison of Mississippi that, Sen. or Smoot of Utah and others had conspired to tinker the sugar tariff or something of the kind. The charge fattened out, of course, and Senator Smoot, in winding up the matter, addressed part of his remarks directly to the Mississippi senator, instead of making them to "Mr. President," the presiding officer of the senate. This is quite unusual. Senator Smoot said among other things:

Mr. Smoot: Mr. President, what jamming, whether in the senate or elsewhere, never created a happy home; political demagoguery never gave a day's work to a laboring man. Shame on the senator presenting to the senate a scheme of some dreamer or stock-jobbing schemer that was never considered favorably for one moment by any American sugar producer, but, on the contrary, was turned down emphatically and promptly. The New York papers published statements to this effect, but the senator from Mississippi evidently did not take notice of them.

TO THE SENATE

ing in that, he will address a letter to Senator Spencer on the subject urging action in the name of "political decency."

Senator Borah is equally determined to force consideration of his measure and will demand action in some form or other.

In the meantime, the preliminary work of campaigning is going on in the various states and reports are already being received at the capital of heavy expenditures of money, actual and contemplated. One candidate for the senate is quoted as saying he is prepared to spend \$500,000 if necessary and is already engaged in an extensive form of campaign advertising, including billboards and phonograph records.

**Word of Hope.**

A railway lawyer tells of a mail-carrier who finally got into a real wreck. He was rushed to a hospital in an unconscious condition and was operated on at once. After the operation, still dazed from the anesthetic, he said feebly:

"What is this place?" "You have," the house surgeon announced, "been badly injured in an accident on a street car, but you will recover."

"Recover?" said the man, bracing up. "Recover? How much?"—Pittsburgh Dispatch.

**An Imitative Pet.**

"Well, you have the house all to yourself while Mrs. Peckton is away?" "Not quite," said Mr. Peckton, "I share the premises with Mrs. Peckton's poodle, who was left in my care. I'm afraid the intelligent animal has modeled its behavior on that of its mistress."

"How so?" "When I try to make myself comfortable with a cigar and a newspaper it eyes me with marked disfavor."—Birmingham Age-Herald.

**This Often Happens.**

"How did Bilthers get a job with the government?" "His congressman had to get him a government job or pay his railroad fare back home."

**So It Seems.**

"Father, what does the American eagle stand for?" "Anything"—Judge.

**Step by Step.**

Step by step men climb the highest peaks.

**Maybe that hill is not there, after all—**

VERY often the hill we seem to be climbing is made out of the common mistakes of diet which starve tissues and nerves and slow down energies.

How smooth and level the path seemed to be when we were younger.

Simple, natural food may level that hill to a smooth path again.

Why not try it?

## ALWAYS HIS UNLUCKY DAY

Dr. Rathenau, German Statesman, Had Dread of Saturday Which His Tragic Fate Justified.

Two weeks before his murder M. Rathenau was chatting with a few friends after dinner in the living room of his villa at Grunwald. The talk had been about the popular superstition which attaches to Friday, a day of evil repute.

"My unlucky day," M. Rathenau remarked, "has always been Saturday. Twice in my life I have nearly been killed. Once, when a child, I was badly injured in a runaway. This was on a Saturday. Then years later I was almost killed in a fall down a stairway—on a Saturday. It's my bad day."

M. Rathenau was assassinated on Saturday—Le Petit Parisien, Paris.

**Make It Dorothy.**

A young man informed Sam L. Duval, president of the Marion County State bank, recently that he wished to start a savings account for his little son. Mr. Duval, seeing the smile on the man's face, guessed that it was a new baby and offered his congratulations, which the patron smilingly acknowledged. The account was opened in the regular way with the father as trustee for Arthur—

Several days later the young man entered the bank and approached Mr. Duval. "Say Mr. Duval," he said, "I'd like to change the name on that account I opened for Arthur a couple of weeks ago. Make it Dorothy."—Indianapolis News.

**Possible, But Not Probable.**

Little Mamie had been a careful observer of her parents' conversation. Accompanied by her mother she was walking one day last spring when two girls wearing gossamer, passed them. Stopping suddenly, Mamie said, "Look, mother, are they some of the 'boogleggers' daddy was talking about?"

First thing youth misses when it leaves home is the cookie jar in the pantry.

**Word of Hope.**
